

## FOR IMMEDIATE RELEASE

### Tracy Schrecengost Promoted to Vice President at Innovatus Imaging Radiography Center of Excellence

**Pittsburgh, PA, November 27, 2018** - Innovatus Imaging President and COO, Bill Kollitz, recently announced the promotion of Tracy Schrecengost to Vice President of Radiography and Managing Director of European Operations. In this role, Tracy will provide strategic leadership for national field service and business operations as well as focus on the European business which is targeted as an area for growth. One of her recent accomplishments has been as a key contributor to the successful launch of the second generation Digital Radiography Retrofit for Innovatus Imaging. Tracy embraces a team-based approach and strives for the highest level of service quality and customer satisfaction. Prior to her past 2+ years of leadership of our field service operations, Tracy served in various supply chain operations positions, for Bayer Healthcare and previous Medrad which was acquired by Bayer Healthcare in 2006. Over 10 of her 20+ years of professional experience has been in leadership roles.

“Tracy’s contribution to streamlining operations while increasing customer satisfaction has been significant in every position she has held,” said Bill Kollitz. “Under her leadership, we have been able to help numerous healthcare facilities minimize the stress of changes in radiography and achieve substantial gains in efficiencies covering CR and DR equipment. We look forward to Tracy’s continuous contributions to help clients achieve their operational and financial goals.”

Information about Innovatus Imaging’s Radiography Center of Excellence radiography systems, Digital Radiography Retrofit systems and services can be found at [www.innovatusimaging.com](http://www.innovatusimaging.com).

**About Innovatus Imaging** Innovatus Imaging was formed in 2017 as a result of the merger of three leading imaging device companies, Bayer Multi Vendor Service, Wetsco, and MD MedTech. Headquartered in Pittsburgh, PA, the brand operates Centers of Excellence focusing on engineering new developments for increasing efficiencies, reliability and durability of imaging device repairs and specialty ultrasound probe manufacturing. Additionally, Innovatus Imaging offers software and hardware products for radiography to support CR, DR and dry film printer needs. Centers of Excellence are located in Pittsburgh, PA (MRI & Radiography and Manufacturing), Tulsa, OK (Ultrasound), and Denver, CO (Design and Manufacturing). Innovatus’ Center in Denver, CO is FDA registered and all quality systems across all operations are ISO 13485:2016 certified.
